

Public Health Advisory

Reminder: Boil Water Advisory – Baker Lake

July 7, 2017

Baker Lake, NU

The Department of Health reminds that all residents of Baker Lake must boil their water before consumption until further notice.

This is a precautionary measure due to high turbidity (cloudy water) levels.

During a boil water advisory, all water for consumption must be brought to a rolling boil for a **minimum** of one full minute.

It is essential that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

It is not necessary to boil water used for anything other than the above list.
