## Boil Water Advisory – Kugluktuk

January 11, 2018

Kugluktuk, NU

---

The Department of Health is issuing a boil water advisory for the Hamlet of Kugluktuk.

This is a precautionary measure due to the new water treatment plant coming online. An update will be provided to residents after a successful review of the new plant is completed.

During a boil water advisory all water for consumption must be brought to a rolling boil for a **minimum** of one full minute.

It is essential that all water be boiled for the following uses:

- drinking
- preparing infant formulas
- preparing juices and ice cubes
- washing fruits and vegetables
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

It is not necessary to boil water for anything other than the uses listed above.
