

Public Health Advisory

Reminder: Boil Water Advisory – Whale Cove

March 28, 2019

Whale Cove, Nunavut

The Department of Health reminds all residents of Whale Cove to boil their water before consumption until further notice.

This is a precautionary measure due to total coliform bacteria in the water system.

During a boil water advisory, all water for consumption must be brought to a rolling boil for a **minimum** of one full minute.

It is essential that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off. The boil water advisory is only for the uses listed above.

Adults, adolescents and older children can shower, bathe or wash using tap water, but should avoid swallowing it. Infants, toddlers and people who have illnesses should be sponge bathed to reduce their chances of swallowing water.

You may still wash your hands with tap water. Make sure you scrub all parts of the hands with soap and warm water for a minimum of 20 seconds.
