## Boil Water Advisory – Clyde River

**November 16, 2021**

**Clyde River, Nunavut**

The Department of Health is issuing a boil water advisory for the Hamlet of Clyde River.

This is a precautionary measure due to a mechanical issue at the water treatment plant. During a boil water advisory, all water for consumption must be brought to a rolling boil for a **minimum** of one full minute.

It is essential that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

It is not necessary to boil water used for anything other than the above list.
