## Boil Water Advisory Reminder for Igloolik

**November 1, 2023**

## Igloolik, Nunavut

The Department of Health is reminding all residents of Igloolik to continue to boil their water before consumption until further notice.

During a boil water advisory, all water for consumption must be brought to a rolling boil for a minimum of one full minute. Boiling kills bacteria and other organisms in the water.

It is essential that all water be boiled for the following uses:

- Drinking.
- Preparing infant formulas.
- Preparing juices, and ice cubes.
- Washing fruits and vegetables.
- Cooking.
- Brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

It is not necessary to boil water used for anything other than the above list.
