## Boil Water Advisory – Rankin Inlet

**July 12, 2024**

## Rankin Inlet, Nunavut

The Department of Health is advising residents of Rankin Inlet to boil their water before consumption until further notice. This is a precautionary measure due to the completion of work on the old/new town water mains.

During a boil water advisory, all water for consumption must be brought to a rolling boil for a minimum of one full minute.

It is essential that all water be boiled for the following uses:

- Drinking.
- Preparing infant formulas.
- Preparing juices and ice cubes.
- Washing fruits and vegetables.
- Cooking; or
- Brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off. The boil water advisory is only for the uses listed above.

The Department of Health will notify the community when the boil water advisory is lifted.
