E. coli infections are bacterial illnesses that can affect anyone exposed to a contaminated food product. People who are infected with E. coli bacteria can spread the bacteria to other people several days to several weeks after they have become infected, even if they don't have symptoms.

This recalled product should be thrown out or returned to the location where it was purchased. Clean and sanitize all surfaces and storage areas that any recalled products may have come in contact with, including countertops, containers, utensils, freezers, and refrigerators.

There have been 20 reported illnesses associated with the consumption of these products.

If you think you have become sick from consuming this recalled product, call your local health centre.

For more information, visit the Canadian Food Inspection Agency website or call 1-800-442-2342. Sign up for food recalls on the CFIA website.
