Emergency landing in Rankin Inlet

Start Date: February 25, 2025 End Date: February 26, 2025 Rankin Inlet

20 sec

At approximately 8:15 pm local time, a small twin-engine aircraft performed an emergency landing at the Rankin Inlet Airport when its nose landing gear failed to deploy. The aircraft landed safely and came to rest on the runway without incident.

Local emergency responders were on the scene to provide support and assistance. The disabled aircraft was removed from the runway shortly after the incident, and the Rankin Inlet Airport has since reopened for normal operations.
