

Public Health Advisory

Coral Harbour boil water advisory reminder

June 18, 2025

Coral Harbour, Nunavut

40 secs

The Department of Health is reminding all residents of Coral Harbour to continue to boil their water before consumption until further notice. This is a safety measure due to inconsistent chlorine levels at the water treatment plant.

During a boil water advisory, all water for consumption must be brought to a rolling boil for a minimum of one full minute.

It is essential that water be boiled for the following uses:

- Drinking.
- Preparing infant formulas.
- Preparing juices and ice cubes.
- Washing fruits and vegetables.
- Cooking; or
- Brushing teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off. The boil water advisory is only for the uses listed above.

The Department of Health will notify the community when the boil water advisory is lifted.
