Canada Community-Building Fund annual allocation

Iqaluit, Nunavut (September 8, 2025) – The Government of Nunavut (GN) is investing more than $18.7 million from the federal Canada Community-Building Fund's (CCBF) 2025-26 allocation to enhance the well-being of Nunavummiut through the development of community-led infrastructure projects.

"This funding supports our commitment to delivering projects that matter to Nunavummiut – projects that are resilient, responsive, and community-driven," said Minister of Community Services David Akeeagok. "The investments advanced through the CCBF help Nunavut communities build the infrastructure they need to grow and connect."

CCBF provides communities with flexibility to address current and future infrastructure needs, including water systems, local roads and bridges, and recreational facilities.

Projects supported by the CCBF include the Metal Shredder Project in Rankin Inlet, which will reduce metal waste in the landfill, extend the lifespan of the waste site, and improve safety and organization. This initiative reflects a shared commitment to community health and environmental stewardship.

The GN continues to prioritize collaboration with local municipalities and the Nunavut Association of Municipalities to ensure the fair and transparent distribution of CCBF funds. These efforts aim to maximize the benefits of infrastructure investments across the territory.
