Public Health Advisory

Drinking water advisory reminder for Sanikiluaq

March 12, 2026
Sanikiluaq, Nunavut **60 secs**

The Department of Health is reminding residents of Sanikiluaq that the drinking water advisory is still in effect. The “Do Not Consume” advisory is in place due to high salinity in the source water.

Water for consumption must come from the reverse osmosis units that have been installed in each household. The advisory will remain in place until the new water treatment plant is operational, and the water is deemed safe for consumption.

It is essential to use water from the reverse osmosis units or store-bought water for the following use:

- Drinking.
- Preparing infant formulas.
- Making juices and ice cubes.
- Washing fruits and vegetables.
- Cooking.
- Brushing teeth.

Please contact the Environmental Health Officer at 867-645-6660 if you have any concerns.
