Public Health Advisory

Food recall due to possible Listeria

September 17, 2026
Nunavut-wide

The Department of Health is warning about a food recall issued by the Canadian Food Inspection Agency (CFIA) due to possible Listeria contamination.

Consumers should not consume the recalled products described below.

Brand	Product	Size	UPC	Code(s)
Olymel	Chicken Breast Strips	2 x 175 g	0 69094 63596 3	Best Before: 2026 OC 10

This recalled product should be thrown out or returned to the location where it was purchased.

Food contaminated with Listeria monocytogenes may not look or smell spoiled but can still make you sick. Symptoms can include vomiting, nausea, persistent fever, muscle aches, severe headache and neck stiffness.

Pregnant women, the elderly and people with weakened immune systems are particularly at risk. Although infected pregnant women may experience only mild, flu-like symptoms, the infection can lead to premature delivery, infection of the newborn or even stillbirth. In severe cases of illness, people may die. If you think you have become sick from consuming the recalled product, call your local health centre.

For more information, visit the Canadian Food Inspection Agency website or call 1-800-442-2342. Sign up for food recalls on the CFIA website.
